ACM - AWS Certificate Manager

- Used to host public SSL certificates in AWS
- There are two way of hosting an SSL certificate in AWS:
 - We can buy our own certificate and upload it to ACM using the CLI
 - We can have ACM provision and renew public SSL certificates for us (at no cost!)
- ACM loads SSL certificates on the following integrations:
 - Load balancers (including the ones created by Beanstalk)
 - CloudFront distributions
 - APIs and API Gateways
